

GEMÜ WORLDWIDE CAPABILITIES ABOUT GEMÜ VALVES, INC.

Gemü Valves, Inc. was established as a subsidiary of Gemü Gebr. Mueller GmbH and Co. KG, Germany and Gemü CH, Switzerland in 1989, to represent and sell Gemü valves product line in the following territories: North America, Mexico and Canada.

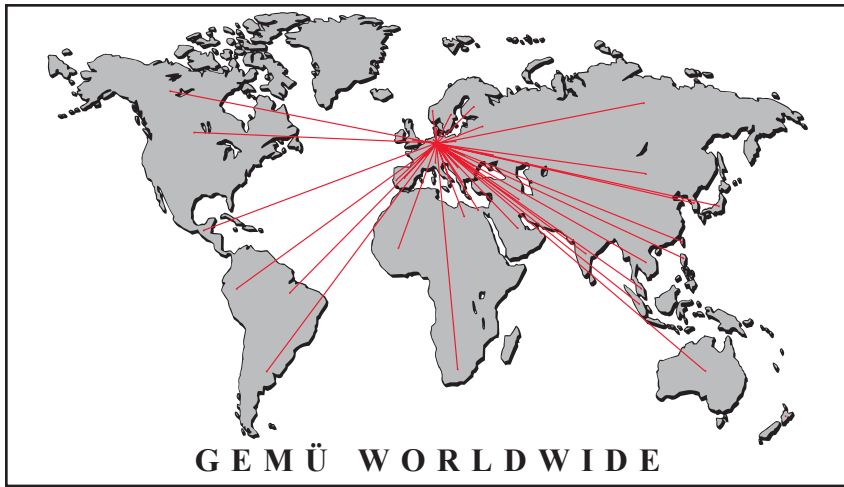

GEMÜ UNITED STATES

Gemü manufactures valves, measurement and control systems for all sectors of industry such as basic and fine chemical, acid handling, mining, general manufacturing, pharmaceutical, biotechnological and food industries as well as microchip production. Gemü is a worldwide presence in the field of valves, actuators and control systems with 9 subsidiaries and 6 production facilities.

Our activity here is to service the market by keeping certain inventory levels, assembling valves, modifying valve bodies -- mainly stainless steel, keeping customers up to date with technical drawings through our AUTOCAD/engineering division and designing custom valves for special applications. Some of the industries Gemü valves are used in are pharmaceutical, biotechnology, semiconductor

high-purity chemical, fine chemical, basic chemical, general process, plant utilities, mining, metal treatment and galvanizing systems, water deionizers and demineralizers, waste water treatment and OEM applications..

GEMÜ WORLDWIDE

OUR COMMITMENT

Gemü valves reflects a high standard of quality that comes from a thoroughly planned and consistently developed innovative modular product line. Various patents and distinctions awarded for outstanding industrial design are the proof. With our systems, we help customers to solve the process engineering and ecological problems of the future.

Compared to competitive products our products are well engineered and designed. Our strategy for meeting the competition is lower price and better quality through our unique innovative modular product line.

TABLE OF CONTENTS

Company Introduction	Pages 2 - 3	Introduction to 620 Series	Page 24
Part Numbering System	Pages 4 - 5	620 Actuators - 2.5" to 12"	Pages 26 - 31
Weir Style Valve Introduction	Pages 6	Straightway Valve Introduction	Pages 32 - 33
Weir Style Bodies.....	Pages 7 - 9	Straightway Technical Data	Pages 34 - 35
Weir Style Diaphragms	Page 10	Straightway Bodies	Page 36

GEMÜ PRODUCTION FACILITIES

GEMÜ GERMANY

Gemü Germany was founded in 1965 in Ingelfingen-Criesbach. Since then, Gemü has formed multiple subsidiaries around the world: France, Switzerland, England, Sweden, Australia, Singapore, Brazil and the US. Apart from the German parent company, Gemü also manufactures products in the US, Brazil, Switzerland, France and China. Gemü sources products from several of these facilities.

GEMÜ SWITZERLAND

Zurich, Switzerland is Gemü's primary production facility for solid plastic products for industrial and electronics applications.

GEMÜ FRANCE

Strasbourg, France is Gemü's primary diaphragm manufacturing site as well as home to the Gemü France market company.

GEMÜ BRAZIL

Curitiba, Brazil is the South American Headquarters for Gemü and is a fully integrated manufacturing facility for industrial products serving both Brazilian and export markets.
